

WHY SKI and BOARD TUNING?

THE ANSWER IS QUITE SIMPLE:

Because you'll have much more fun on the slopes afterwards.

It's Easy To Explain Why

1. A professional edge grind enhances grip even in icy slope conditions. Precise edges promote easier gliding and less effort in handling.
2. An optimum structured base ensures the perfect "turning moment" and smooth easy gliding in all snow conditions.

BEFORE:

- Edges are rusty and dull
- Base is scratched
- Base has no structure

AFTER:

- Edges are perfectly tuned
- Smooth, waxed base
- Structured finish

SHUMAKER'S CERTIFIED WINTERSTEIGER TECHNICIANS CAN PROGRAM A CUSTOM TUNE THAT GETS YOU THE RESULTS YOU NEED

**First Class
WINTERSTEIGER
Ski & Board Tuning**
